Transitional Housing + Foster Care

Promesa Behavioral Health offers three types of housing models to fit the needs of non-minor dependent youth (18-21). Single site facility, shared apartment living, and Host Family Model. Youth driven and Youth focused, our transitional housing team is focused on permanency. Our goal is successful independent living and a permanent connection with a caring, supportive adult by 21. Our transition team uses the National Foster Care Transitional Toolkit to guide the path to successful independent living by 21.
